New Practibox™,
stylish & easy to use

FLUSH-MOUNTING DISTRIBUTION CABINETS
FOR LIVING AREAS AND WORKPLACES

Legrand®

Stylish & easy to use

Practibox flush-mounting distribution cabinets blend perfectly into living areas or the workplace with their white finish and clear windows.

Thanks to the reversible faceplate, the door can be either right or left-opening. It can be fitted with a key lock.

These additional features increase the added value of your projects.

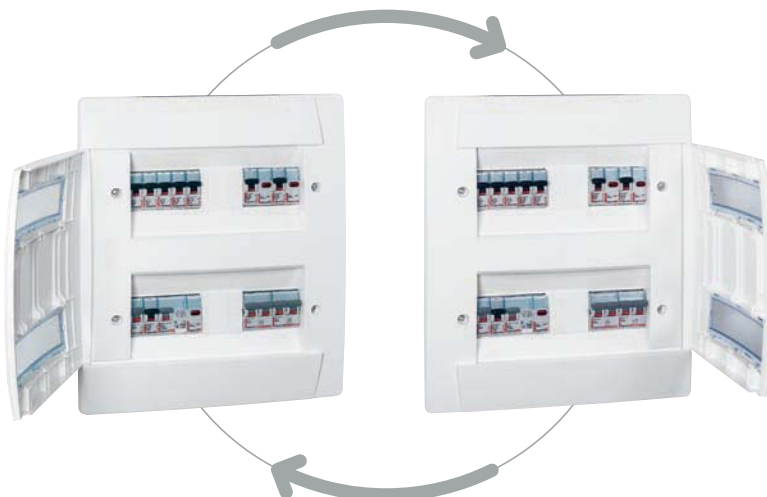

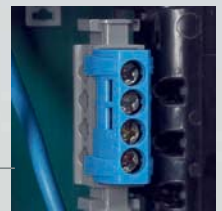

The reversible faceplate means the door can open to the left or right, thus offering maximum flexibility during installation on site.

Easy wiring

Ease of installation due to terminal blocks which can be installed at the top, bottom or on the sides, between the rails, and directly on the flush-mounting box.
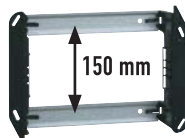

More space available between the rails, terminal blocks installed on the flush-mounting box at the top, bottom or even between the rails. Cabinet faceplate fixes easily on the flush-mounting box thanks to recessed grooves.
Key features for easier installation.

150 mm

Flush-mounting masonry box with integrated slots for the terminal blocks

Chassis with vertical adjustment. Corrects the level of a flush-mounting box. Space between the rails 150 mm

Cabinet faceplate and door with recessed grooves at the back to assist fixing on the box
